MEET THE GIFT

GET TO KNOW US BETTER

In 1996 The Gift started developing and selling bags and outdoor products under the Norländer brand name. Twenty-five years later, The Gift is a leading supplier in the field of home & deco, travel, outdoor, sport, electronics and cosmetics.

Because of our driven purchase department and short communication lines in various production countries, we offer extensive collections with modern and affordable products.

In addition to Norländer, the brands SENZA, KUMAI and BRAINZ are also part of The Gift's overall brand portfolio. Each brand is characterized by its own identity and range.

The collections grow every year. Not only in size, but also in quality and durability. Beside our own brands, The Gift is also your partner for custom-made productions and private labels.

THINK ECO

ENVIRONMENTAL SUSTAINABILITY

Good and affordable products, that is what we strive for every day at The Gift. The origin of the raw materials of our products, the working conditions in the factories and the environmental policy of the supplier have an increasing impact during production. Not only for us, but also for you as customer. The demand for sustainable products and services continues to rise. Our responsibility to deliver a good and affordable product is therefore very important.

Here at The Gift, we include as many nature-friendly articles as possible in our collection. For instance, RPET bags, plaids, trolleys, but also Seagrass, Wheat straw, Bamboo, Acacia wood, Paper and Hyacinth products. We are also in favor of the use of sustainable packaging as an alternative to plastic packaging, such as kraft or no packaging at all.

At The Gift, we believe that sustainability starts with the basics. Our core business, product development and sales are accompanied by many strategic purchasing rounds. We first look carefully at what the possible sales could be before production is started. Will there still be stock left at the end of the year? Then this will be sold in our B2C webshop. No waste!

Due to our mostly overseas productions, our responsibility as a supplier is great. We strive for the most efficient supply chains for the production and transport of our collections. We transport our collections extremely cost-efficiently and flexibly by sea freight. We limit air transport from the Far East in order to save costs and the environment. For instance, we are affiliated with the Rotra Green Footprint program and therefore transport climate neutral.
